**Flammable Limits in Air Upper Percentage:** **Maximum % by volume of vapour in air above which propagation of flame does not occur on contact with a source of ignition: N/D**

**Mechanical Impact Sensitivity:** None known

**Firefighting Procedures:** Containers can build up pressure when exposed to heat or fire. If a fire involving large amounts of material should develop it should not be approached due to the risk of rupture by individual containers causing a “fireball” effect. Firefighters should wear self-contained breathing apparatus and full protective clothing gear to prevent contact with skin and eyes. Use water spray to cool nearby containers and structures exposed to fire.

**SECTION 6. ACCIDENTAL RELEASE MEASURES**

**Action to be taken if product is released or spilled:** Wipe, scrape or soak up in an inert material and put in a container for disposal. Wash walking surfaces with detergent and water to reduce slipping hazard. Wear proper protective equipment as specified in the protective equipment section. Large quantity spills should be contained and pumped into drums for recovery or disposal.

**SECTION 7. HANDLING AND STORAGE**

**Precautions for Handling & Storage:** Keep container closed when not in use. Good hygienic practices should be observed. Work clothes should be washed separately at the end of each work day. Disposable clothing should be discarded with material. Do not add directly to food in process.
